

# Compliance for Email & Multi-Channel Communications

Eliminate risk exposure with consistent policy supervision across your entire business communications ecosystem

Organizations lack visibility and policy controls across the entire business communication ecosystem. This gap can lead to regulatory fines and reputational damage. Today's workforce increasingly relies not just on email, but on numerous business communication channels to do their work. Compliance teams must keep up with communications across collaboration, CRM, social media, and mobile messaging to adequately measure and manage risk.

The SafeGuard Cyber platform saves compliance teams time and effort by automating content capture and the detection of policy violations, using patented Natural Language Understanding (NLU) technology. With coverage for over 30 communication channels, SafeGuard Cyber offers one platform to consistently manage and supervise policies across all your business communications, from corporate assets like email, Slack, and Teams to personal apps like WhatsApp, Telegram, and LinkedIn.

## Common Use Cases

### ARCHIVING

- > Full content capture in native format
- > Capture deleted content and messages
- > WORM-compliant archiving of all content
- > Supports compliance with SEC rule 17a-4, FDA reporting, audits, etc.

### POLICY APPLICATION

- > Consistent policy application for 50+ languages
- > Industry template library for promissory language, pharmacovigilance, etc.
- > Customizable policy engine, supported by transparent ML

### E-DISCOVERY

- > Enhanced search by any attribute: user, channel, dates, keywords, etc.
- > Export capability to .PST, .CSV, and print formats
- > Full audit trails for every interaction

### SALES ENABLEMENT

- > Integration with Seismic LiveSocial for pre/post content review
- > Social account profile supervision

45%

of business communication is now in **digital channels outside of email**, a 17% increase since 2020<sup>1</sup>

58%

of companies now view **compliance as a barrier** to entering new markets<sup>2</sup>

87%

of organizations see risk management as **reactive and costly** vs proactive<sup>3</sup>

# What Makes SafeGuard Cyber Different

## KEY BENEFITS

### MULTI-CHANNEL COVERAGE

Coverage for 30 other business communication channels, including both corporate and personal apps gives compliance teams unprecedented visibility for inbound and outbound messages.

### MULTILINGUAL NATURAL LANGUAGE UNDERSTANDING

Patented NLU technology, with autodetection of 52 languages and cloud-based machine learning, helps teams scale supervision quickly to understand the context and intent of global business communications.

### OUT-OF-THE-BOX POLICIES

Policy Library has out-of-the box policy templates — like FINRA, SEC, FCPA, RESPA, FHA, MiFID II, ASIC, IIROC, and FCA — so you can start reducing risk from day 1.

### NATIVE APP EXPERIENCE

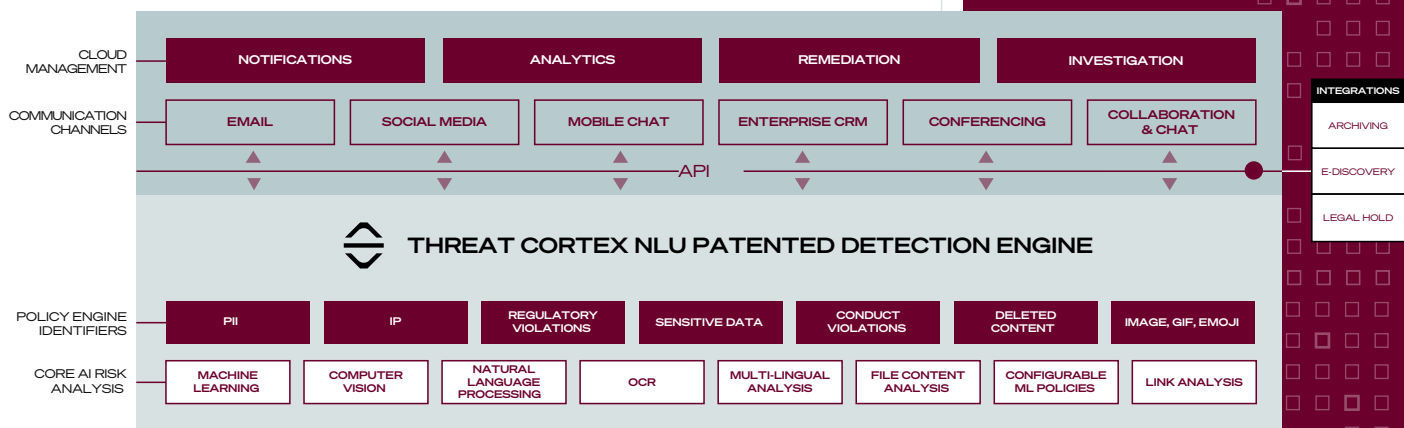

Our API-first approach means there's no software to install. Platform is easy to manage and ensures native app experiences and opt-in for personal apps such as WhatsApp.

### SELECTIVE ARCHIVE FOR USER PRIVACY

Industry-first innovation ensures user privacy by only analyzing and archiving communications between business contacts when supervising personal apps on unmanaged devices.

- > Reduce oversight costs by up to 80%
- > Ensure consistent policy application across your entire business communications ecosystem
- > Assure governance with best-in-class coverage for personal mobile apps like WhatsApp and Telegram
- > Scale quickly with support for 50+ languages
